

## Wrapping and coining machine for chocolate

AND SIMILAR PRODUCTS IN CIRCULAR, OVAL AND SQUARE SHAPES

The machine is equipped with a foil cutting unit and simultaneous coin wrapping, together with two coining units.

This feature enables it to double the printing time, thus guaranteeing perfect coining even in cases of deep coining.

Using two reels, one for the top front and one for the lower front, allows coins with different sides to be produced, using different reels.

### Main characteristics

- ✓ The machine is entirely enclosed.
- ✓ The main parts are automatically lubricated, the moving parts are easy to inspect, and it works using a motor incorporated into the base.
- ✓ Feeding by loading tubes.
- ✓ Digital speed adjustment device.
- ✓ Automatic electronically controlled foil advancement device allows for perfect centring and advancement only in the presence of the coin.
- ✓ Foil cutting and coining in one step.
